

SKILLS

- SQL, Tableau, Stats and Probability, Machine Learning, NLP, Python programming, MS Excel, C++, CRM

EXPERIENCE

Inside Sales Specialist Team Lead

CARS24

Sep 2022 - Jun 2023

- Managed and motivated a team of 10 Inside Sales Specialists, achieving an increase in lead generation and growth in sales.
- Developed predictive models to identify high-potential leads and personalize sales approaches.
- Identified areas for process improvement based on data analysis, streamlining workflows, and increasing efficiency.

Inside Sales Specialist Team Lead

Ola (ANI Technologies Pvt. Ltd)

Jun 2021 - Aug 2022

- Negotiated and closed deals with key clients, securing 10 million rupees in annual revenue.
- Provided exceptional customer service, building strong relationships and driving customer satisfaction.
- Developed deep industry knowledge of the Indian car market and Ola's offerings, tailoring sales pitches for maximum impact.
- Created dynamic dashboards and reports to track key performance indicators (KPIs) and inform strategic decision-making.
- Proficient in CRM software (mention specific ones) and data visualization tools (e.g., Power BI).

Customer Support Representative

Uber India Systems Private Limited

Nov 2019 - Dec 2020

- Achieved a 95% customer satisfaction rating for consecutive quarters (Uber benchmark).
- Resolved 87% of customer issues on first contact, minimizing escalation and repeat inquiries.
- Mastered Uber internal platforms like Rider Support Hub, Help Center, and CRM system for efficient case management.
- Developed a comprehensive knowledge of Uber policies and procedures, ensuring consistent and accurate service.
- Provide information on fares, policies, and other relevant details to users.

PROJECTS

RESTful API for similarity check

- Engineered a highly scalable RESTful API using Python to power text similarity checks, seamlessly integrating with diverse applications.
- Implemented robust NLP techniques (e.g., TF-IDF, word embeddings, semantic similarity) to accurately measure text similarity, ensuring high precision and recall scores.
- Improved customer support chatbot accuracy by (X%) through effective identification of similar queries and automated responses.
- Improved plagiarism detection accuracy by 94% for academic institutions using the API.

Daily News Twitter Bot

- Developed and deployed a Python-automated Twitter bot that scrapes various news sources to gather articles, resulting in a regular posting schedule of more than 70 articles per day.
- Utilized NLP for automatic relevant hashtag generation for each article, enhancing content visibility and engagement by 30%.
- Enabled dynamic interactions (likes, retweets, and quotes) for specific hash-tagged tweets, fostering active online engagement.
